feeding india
A ZOMATO GIVEBACK

our **recipe** for change

In India, malnutrition is not just a health issue. It is one of the biggest barriers that stops a child from growing, learning, and one day earning a dignified livelihood.

When a child faces prolonged hunger, the body is forced to make hard choices. It may stunt growth to save energy. It may lose healthy weight, bone, and muscle mass. In its most severe form, the body even starts breaking down its own fat and muscle just to stay alive.

Any child who goes through this in their early years starts life at a clear disadvantage. A hungry child struggles to focus in the classroom. On the playground, they cannot fully test their strength, balance, or flexibility. Over time, this affects how their brain develops, how they think, and how they see their own potential.

This is the gap Feeding India works to close.

Every day, Feeding India stands beside over one hundred thousand children as a quiet, reliable presence in their lives. Not only do we make sure they are not hungry, we work to ensure their meals are diverse, wholesome and nourishing.

This report covers our work and impact created between April 2024 and March 2025.

our reach

What began as a mission to end classroom hunger has transformed into one of India's largest collaborative movements against malnutrition. Today, our kitchens, partners, and volunteers form a living network that delivers not just food, but a daily assurance of care, consistency, and opportunity—to children who need it most.

Across schools and anganwadi centres, this movement now reaches thousands more each week, building resilience where hunger once took hold.

The numbers tell one story of growth. The real story, however, lives in the renewed energy of a child who can now focus in class, play with confidence, and dream a little bigger each day.

from our donors

“

After witnessing many malnutrition cases in my career, I believe food is the best medicine. I donate because no child should suffer due to lack of nutrition and trust Feeding India to reach the ones who need it the most.

medical superintendent, 38 years

“

I spend my day navigating the busy streets of the city. If I can afford to spend on a meal for myself, I can just as easily set aside a small amount to feed a child in need. For me, it's not a sacrifice, but a simple act that costs me little and means everything to someone else.

cab driver, 33 years

“

I regularly donate to global causes like the World Rescue Organisation and World Animal Protection. I trust Feeding India because of Zomato's legitimacy and strong systems. I believe that while the world moves towards luxury, many still struggle for basic needs, and it's our shared responsibility to support them.

fashion designer, 27 years

“

I value scale, transparency and strong procurement systems. I support Feeding India because the mission is driven purely by impact, not personal gain. For me, the clarity of purpose and accountability makes the organisation worth supporting.

entrepreneur, 45 years

02

daily feeding program

fuelling dreams through nutrition

when hunger ends, **possibility** begins

One plate, every day, is our simplest product – and it shapes a smarter, stronger India. Here's how...

Across India, there are NGOs running formal schools, hostels, tuition centres, informal learning centres, mobile classes, music academies and sports centres full of children who arrive with curiosity, just not always with breakfast. This program plugs directly into these classrooms and turns them into places where hunger is no longer the loudest voice in the room.

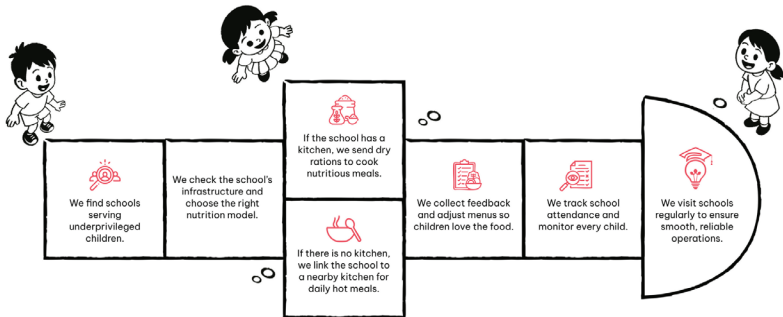

Every school day, we deliver hot, nutritious meals at scale – consistent, predictable, designed for growing minds and bodies. When a child is not running on an empty stomach, attention goes up, questions come faster, play becomes bolder and school becomes a place they want to come back to.

When many children eat well every day, they grow up to become kinder teachers, wiser doctors, better builders and braver leaders.

That is how a simple plate of food today can help build a smarter, gentler India tomorrow.

how it works

wholesome and nutritious meals

Our meal plans are thoughtfully crafted to reflect local culture, dietary preferences and seasons, while keeping plates varied and balanced. Here are some of the most loved dishes by children from different regions of India that we cater to.

renu

THE GIRL WHO

TURNED GRIT INTO MEDALS

scan the QR to
see her journey

Renu, a football champion from Hisar, Haryana, was trained under the Sports Lab Program of Roots Foundation. With consistent hard work and guidance from her coaches, she secured second position at the Asian Games and a bronze medal at the South Asian Games. She also bagged second position at the Senior National Women's Championship and won silver medals at the Junior National Championship in 2016 and 2018. Renu dreams of a successful career in football and aspires to represent her country internationally.

vanshit

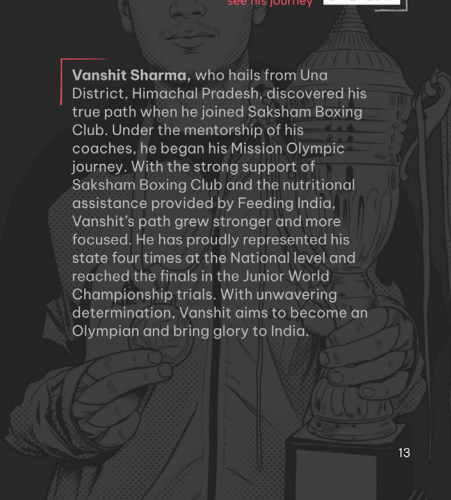

STRENGTH IN

EVERY JAB

scan the QR to
see his journey

Vanshit Sharma, who hails from Una District, Himachal Pradesh, discovered his true path when he joined Saksham Boxing Club. Under the mentorship of his coaches, he began his Mission Olympic journey. With the strong support of Saksham Boxing Club and the nutritional assistance provided by Feeding India, Vanshit's path grew stronger and more focused. He has proudly represented his state four times at the National level and reached the finals in the Junior World Championship trials. With unwavering determination, Vanshit aims to become an Olympian and bring glory to India.

prothama

SPARKS IN HER EYES AND STARS ON HER SCORECARD

scan the QR to
see her journey

Throughout her academic journey with Om Foundation, Noida, Prothama has demonstrated exceptional dedication, discipline, and determination. Her hard work culminated in her securing an outstanding 99.25% in grade 12. This exceptional performance opened the doors for her admission into National Law University (NLU), Kolkata, one of India's premier law institutions. What makes her journey truly inspiring is the resilience she has shown despite coming from an underprivileged background. With limited resources but an unwavering passion to excel, Prothama has consistently pushed herself to overcome obstacles.

shantha

TURNING

DETERMINATION INTO TRIUMPH

Shantha from Tamil Nadu, who lives with hydrocephalus and mild intellectual disability, is one of Sri Arunodayam, most promising para-athletes. She has won multiple State-level medals in running, long jump, and discus throw, and secured top national rankings at the 23rd National Para Athletics Championship and Khelo India Para Games. Her biggest milestone was winning two silver medals at the 14th Junior & Sub-Junior Nationals, earning ₹2 Lakhs per game. She is now preparing to represent India at the International Para Games.

akshar foundation

guwahati, assam

"We had a five-year-old child who used to refuse to eat food and did not even have the strength to play. After introducing proper nutrition into his daily meals, we witnessed a remarkable change in his energy levels. His interest in food returned, and over time, the transformation in his health and behaviour became clearly visible to everyone around him."

Principal, Akshar Foundation

Scan to watch
their story

Every student plants trees, grows food, and pays weekly "school fees" with plastic waste from their homes.

Teenagers earn points like "wages" for part-time work like carpentry, tutoring, etc. helping them in building entrepreneurial skills.

At Akshar Foundation, addressing social issues is a major part of the curriculum, transforming children into agents of change, working towards building a better future for their own communities.

Partner since **September 2024**

breakfast, lunch & snacks daily

malvi educational and charitable trust

navsari, gujarat

"The BMI and other health indicators of some of the most malnourished tribal students we serve has shown visible improvement since our collaboration with Feeding India. From June 2024 to April 2025 we tracked our primary grade students with a BMI less than 12.50 which is considered abnormally low. Over a period of one year, there was an average improvement of 9.50%. Not only this but these students are also clearly more physically active."

President, Malvi Educational and Charitable Trust

Over the past four years, 67 tribal students have been enrolled into MBBS or BAMS colleges -which is about 40% of the total batch strength, thanks to the efforts of this school.

The two residential schools host 1000 tribal students, with 45% of them being orphans or those with a single parent and 60% being girls.

Shantaba Vidyalaya was established in 2005 and caters to children from tribal communities of all 6 districts of South Gujarat.

Partner since **May 2024**
Serving **859+** children breakfast, lunch, snacks & dinner daily

innovation for change

lucknow, uttar pradesh

"Innovation for Change (Vanchit se Charchit) has empowered over 15,000 slum children in Lucknow with education, skill development and creativity. This journey became smoother after we started working with Feeding India. Food is the foundation of development and now we feel truly relaxed because they take care of this big responsibility of our children, allowing us to focus more on their learning, innovation, and growth."

Co-founder, Innovation For Change

Founded by visionary students, Innovation for Change (IFC) began as a small initiative with street plays addressing social issues in Lucknow. Today, they have grown into a movement impacting thousands of lives across Uttar Pradesh.

Noted designer Sabyasachi Mukherjee has lauded the children of this school for progressive talent in design and art.

A dedicated "36 Gunn" program offers vocational training in 36 skills. Regular sporting activities are also an imperative to encourage physical health and teamwork.

Partner since **July 2024**
Serving **200+** children breakfast, lunch, and snacks daily.

03

the anganwadi program

a healthy start for little hearts

nourishing toddlers

Today, too many children under six are starting life at a disadvantage – they're too short, too thin, too weak, not because of who they are, but because the food and care around them simply aren't good enough in the years that matter the most.

On the front line of this crisis sit nearly fourteen lakh anganwadis. They are meant to be India's first classroom and first canteen – places where children eat, play and get ready for school. Unfortunately, a large number of these anganwadis are just surviving with broken infrastructure, inconsistent staples, poor food diversity and overall little support. The intent is strong; the system around them is not.

Feeding India stepped into this gap with a simple idea: by rebuilding anganwadi spaces and supporting nutritious meals, we can change the trajectory of a child's life. Brick by brick, meal by meal, we are turning neglected centres into vibrant little schools, and basic rations into diverse, dignified nutrition.

This program is about reimagining the first six years, so every child, no matter where they are born, gets a real chance to learn, grow and someday build a better India than the one they were born into.

our interventions

GURUGRAM

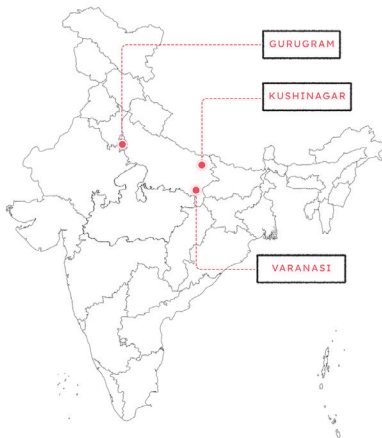

- 222 anganwadis supported with supplementary nutrition
- 13 anganwadis redeveloped
- 9,911 children impacted

KUSHINAGAR

- 127 anganwadis supported with supplementary nutrition
- 6 anganwadis redeveloped
- 359 children impacted

VARANASI

- 328 anganwadis supported with supplementary nutrition
- 36 anganwadis supported with primary nutrition
- 12 anganwadis redeveloped
- 16,729 children impacted

how we started

In Gurugram, Kushinagar and Varanasi, we decided to start with something simple and powerful: what fits in a child's hand.

Ragi laddoos, peanut laddoos and fresh fruit: dense, familiar, micronutrient-rich foods that double as a light snack and the right fuel that fortifies mental and physical growth.

Supplementary
nutrition

But we knew that wasn't enough...

so, we pushed the **idea** further

In 36 anganwadis of the Benipur sector in Varanasi, Feeding India now takes responsibility for the two anchor moments of a child's day: breakfast and lunch.

This isn't just a menu, it is a carefully constructed formula: diverse ingredients, familiar tastes and sufficient energy to turn hunger into attention, play into learning, and a few years of consistent and good food into a lifetime of better outcomes.

Primary nutrition		
	BREAKFAST	LUNCH
MONDAY	Besan Chilla	Arhar Dal & Rice
TUESDAY	Aloo Chana	Vegetable Pulao
WEDNESDAY	Halwa	Rajma Rice
THURSDAY	Idli Sambhar	Dal Pithi
FRIDAY	Sweet Daliya	Aloo Puri
SATURDAY	Fruits	Chole Rice

Scan the QR to
watch our journey

we map, track and evaluate progress

Feedback is at the heart of strong system design. It tells us when we are off track and where we should double down.

With just three simple checks – a child's height, weight and MUAC (mid-upper arm circumference) – we can identify a child who is stunted, underweight or wasted.

When we started work in Benipur, Varanasi, we measured over a thousand children between 3 to 6 years of age to get a clear baseline.

Every few months, we return to measure them again and observe how our program is changing their lives.

We may not start with all the answers, but we have a strong feedback loop to keep learning and moving towards the right ones.

understanding malnutrition in children

Stunting

When a child is too short for their age

35% of India's children are stunted

Underweight

When a child weighs too little for their age

32% of India's children are underweight

Wasting

When a child is too thin for their height

SAM (Severe Acute Malnutrition)

MAM (Moderate Acute Malnutrition)

severe wasting, also called SAM/MAM is when a child is extremely thin and weak, and in need of immediate medical treatment

19% of India's children are SAM/MAM

Data Source

*National Family Health Survey
(NFHS-5), 2019-21*

anganwadi redevelopment

Robust model with high-quality materials like burnt clay F.P.S. (Fire - Proof Silica) bricks, steel reinforcement, waterproofing, and stone flooring ensures long-lasting redevelopment.

Corridors, doors, and ceilings were upgraded with added colour to create a welcoming space for children.

BoLA (Building as Learning Aid) transforms schools and anganwadis into vibrant learning spaces where walls, floors, and classrooms become teaching tools.

We support anganwadis by providing safe drinking water facilities, along with taps fitted with child-friendly safety features.

To improve hygiene conditions, we upgraded the facilities by installing water closets, squatting pans, wash basins, sanitary fixtures and pipelines.

community mobilisation

gathering together for a cause

where music met a mission

On 30th November, 2024, Zomato hosted the second **"Zomato Feeding India Concert"** in Mumbai, bringing 28,000 people together for a single purpose: to end child malnutrition in India.

Dua Lipa lit up the stage, but the real spotlight was on a cause that will shape the future of our children. This was more than a concert; it was the start of a conversation our country can no longer delay.

scan the QR for
the full experience

children's day 2024

The first edition of #UnboxingJoy was celebrated on Children's Day, 14th November. It brought a wave of excitement across our partner schools as we rolled out 1,119 Decathlon sports kits - including footballs, badminton kits, frisbees, sports bags, cricket kits, and tennis balls. The energy was palpable the moment children unboxed their kits. Volunteers from across Eternal joined in, filling the day with warmth and enthusiasm. We shared special meals, played cricket and badminton, and jumped into countless spontaneous games with the newly opened toys. The laughter, the cheers, and the joyful chaos created an atmosphere that felt truly magical - an afternoon where joy was unboxed in its purest form.

scan the QR for
the full experience

holi 2025

On 7th March, Holi unfolded in a bright, heartwarming way for more than a thousand children across 16 cities, as Feeding India brought the festival to life in partnership with NGOs and schools. Throughout the day, children explored a world of colour and creativity, shaping artwork with their palms, fingertips and threads, each piece alive with imagination. A holi that felt both meaningful and wonderfully alive.

zomato birthday 2024

We celebrated Zomato's 16th birthday on 10th July, and the spirit of the day extended far beyond the office walls. Across multiple Feeding India NGO centres, the celebration took on a life of its own. Children spent the day immersed in joyful activities - from playful games to creative learning sessions with our volunteers. A specially curated meal was also shared with the students, adding a gentle touch of care to the festivities.

The day served as a reminder that behind every milestone in the company's journey lies another, quieter story - one of nourishment, opportunity, and hope being woven every single day through Feeding India's work.

harvard model united nations India

In August 2024, Feeding India served as the Sustainability Partner for Harvard Model United Nations India, one of the nation's premier student conferences.

Engaging over 2,000 students from 200+ schools across Bengaluru and New Delhi, we highlighted the critical intersection of climate action, food security, and child nutrition. Through targeted sessions, delegates explored how sustainable choices and community-led initiatives can effectively combat hunger and malnutrition.

poshan potli

In February 2025, Feeding India launched Poshan Potli, a comprehensive nutrition initiative designed specifically for tuberculosis (TB) patients in close partnership with DTC (District Tuberculosis Centre), Varanasi.

Recognizing the critical role of proper nutrition in TB recovery, each kit was thoughtfully assembled to sustain a patient for a full three-month period. All 1,000 kits contained a variety of nutrient-dense foods intended to help patients maintain physical strength, bolster their immune systems, and support overall well-being during treatment.

06

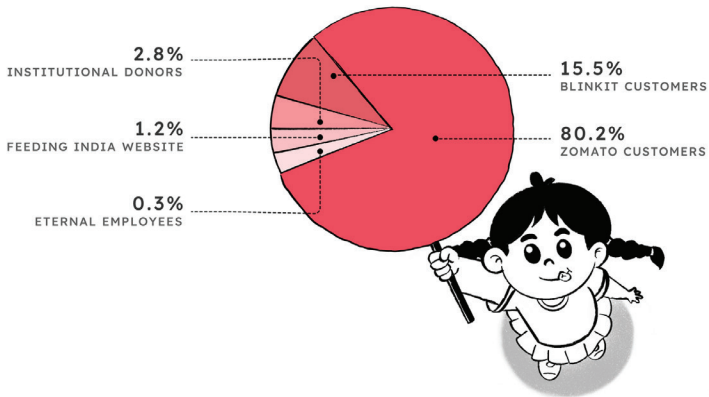

finance

accountability drives change

income breakdown

Zomato customers are our top contributors, bringing in nearly 80.2% of the total funds, followed by Blinkit customers at 15.5%. In comparison, direct giving channels including institutional donors, our website donors and Eternal employees together make up less than 5% of the inflow, highlighting how donations lean on platform-driven contributions.

expenses breakdown

Our spend distribution reflects a balanced portfolio, strategically allocating resources across core programs, disaster relief and community mobilisation while maintaining administrative efficiency to maximise impact.
